

Creating a poster for the DEMBE Theatre

In the foyer of the DEMBE theatre we have space to put up 2 x A1 posters, and 6 x A2 posters advertising your upcoming performance.

We can also take A5 leaflets which can be placed in our flyer holders in the foyer, and be handed out by our front of house staff as audiences exit the theatre in the weeks leading up to your event.

This document has been created to provide you with information about how to use the DEMBE Theatre header and footer on your poster/leaflet (we understand that for some of you visiting the DEMBE as part of a wider tour, your poster may not use the header and footer)

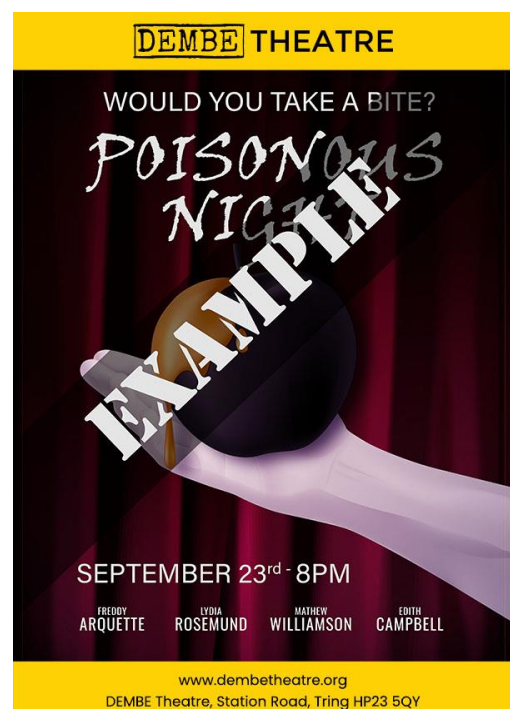

On our resources page you will find links to the DEMBE Theatre headers and footers. These have been created in A1, A2 & A5 size. Please ensure that you choose the correct size for your poster so that there will be no need to resize the document and risk distorting / pixilating the image.

These files are .psd files which are compatible with photoshop, and is the programme that we would recommend you use for creating your posters/leaflets.

The headers and footers have been designed with a 'bleed' ready for sending for print. For those new to creating print material, on the resources page there is also a handy overview of working with 'bleed' and preparing your document for print.
